

The Quickest and Easiest Flooring System You'll Ever Build!

BECAUSE WE'VE DONE THE THINKING FOR YOU!

Instead of the old way, waiting until a product turned up onsite to start measuring, marking and cutting the bearers and joists, Spantec Smartbearers are printed with joist and bracket details as well as pre-punched bracket location holes ready for assembly.

Spantec's done the hard work for you!

This massive step forward in speeding up construction and saving you costs is due to Spantec's CAD technology and automated manufacturing.

Your floor is designed to your requirements and delivered as a complete kit including:

- Pre-punched and printed perimeter bearers
- Bearers and joists marked to match drawings
- Bearers and joists cut to length
- Detailed working drawings
- Brackets
- Screws
- Ezi-brace
- Ezi-pier adjustable piers

BOXSPAN[®]
STEEL FLOORING SYSTEMS

Applications

- Sloping sites | Bushfire areas | Flood zones
- Any elevated home
- Kit homes
- Granny flats
- Decks

Advantages
